- Analyse the requirements
- Deal with SRS DOC

Attendees

- Rafeef AlSuhaibani
- Aliaa AlRishan
- Lama AlShmali
- Raghad AlYaeesh
- Raghad AlSuhaibani
- Sumayh AlHarbi
- Amani AlHarbi

Review project's idea

By Rafeef AlSuhaibani

The idea of the system

How the system works was determined by everyone

- The application determines whether this product contains an allergen that the user has.
- Each user has a personal profile where they enter their personal information and the type of allergy they have.
- It provides the possibility of communicating with a specialized doctor either in writing or orally, available as soon as possible, or guiding the user to the nearest hospital.
- It offers the feature of scanning the product barcode using the camera or manually entering it.
- It provides suggestions for alternatives to the product if it is found to contain any allergens.
- The application includes a page where users can share their recipes and others can interact with them.

Raghad Al-Suhaibani

Today's outputs of the meeting:

1. We presented and discussed ideas for the app.
2. We discussed the different aspects of the application, including its number of app pages and the associated requirements with it.
3. We divide the tasks of SRS between us.
4. We determined that the next meeting will be held on October 7, 2023.
